Redesign direction

Premium global visual redesign, preserving current content, sections, pages, routes, and API contracts.

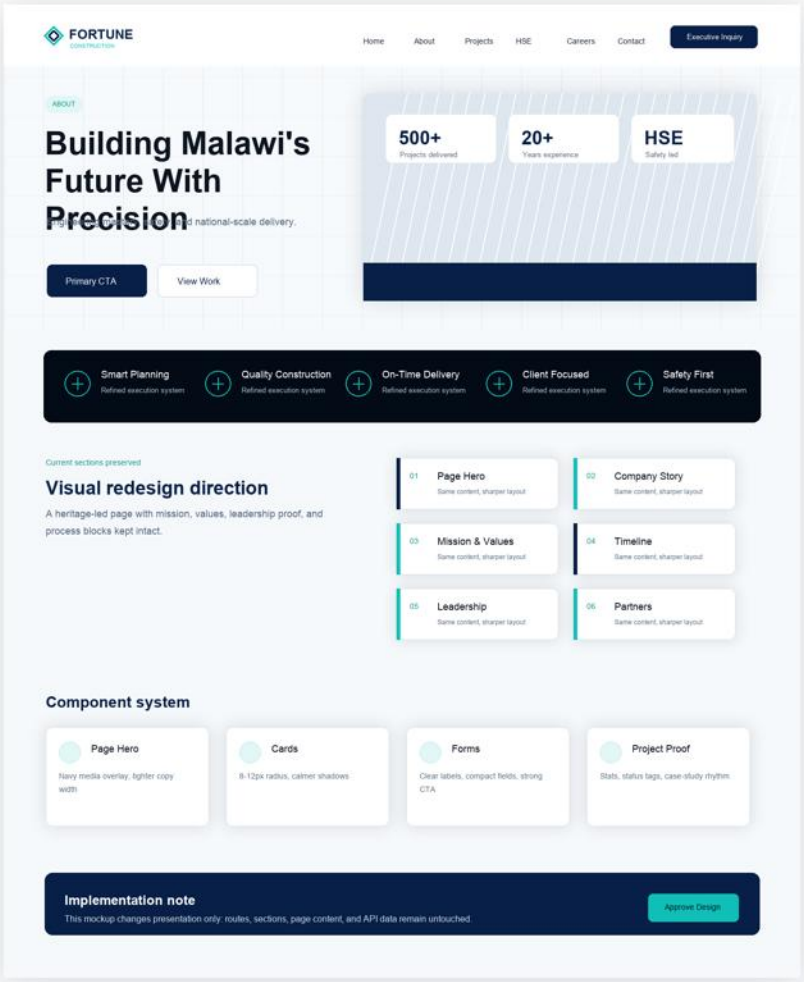

- Primary palette is derived from the logo: navy #082048 and teal #10c0b8.
- Teal becomes an action/accent color instead of dominating every surface.
- The visual system reduces excessive roundness and glass effects in favor of cleaner, sharper UI.
- The dashboard uses a more operational layout: stronger sidebar, clearer KPI cards, cleaner tables, and direct actions.

UI system

The redesign keeps Fortune's construction identity while making every screen feel calmer, more mature, and more international.

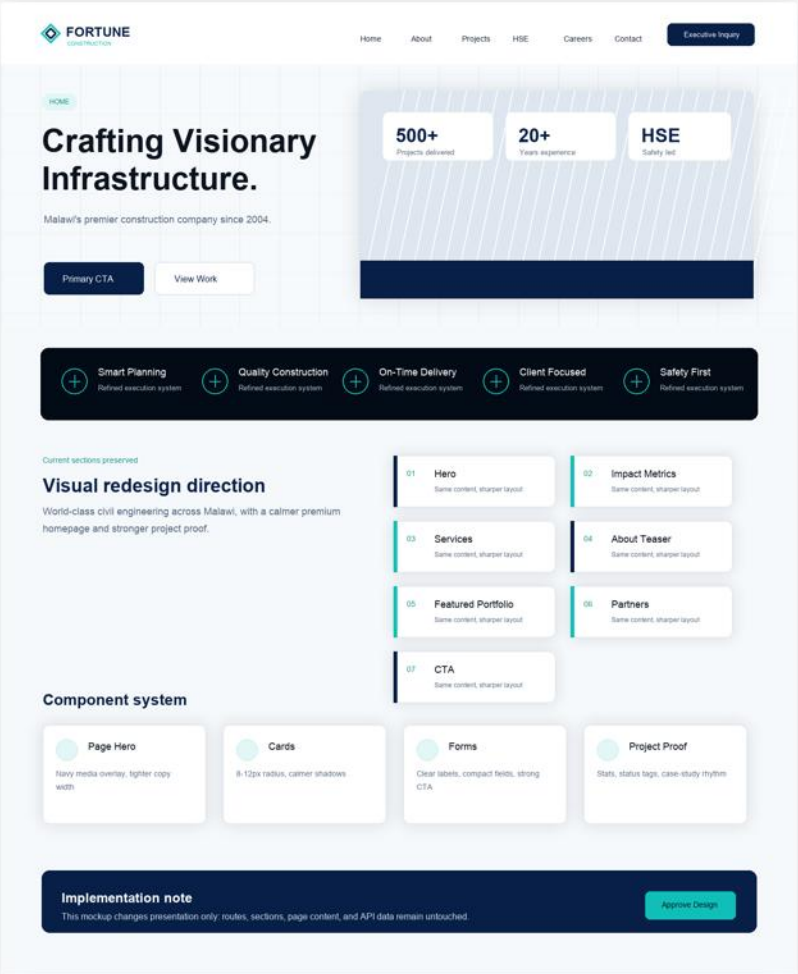

- Navigation: white or navy surfaces, compact links, clearer active states, and direct inquiry actions.
- Cards: 8-12px radius, subtle navy shadows, thinner borders, and stronger content hierarchy.
- Forms and tables: clearer labels, better spacing, and more visible primary actions.
- Page heroes: project or construction media, measured overlays, proof metrics, and concise page introductions.

Site 01 Home

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

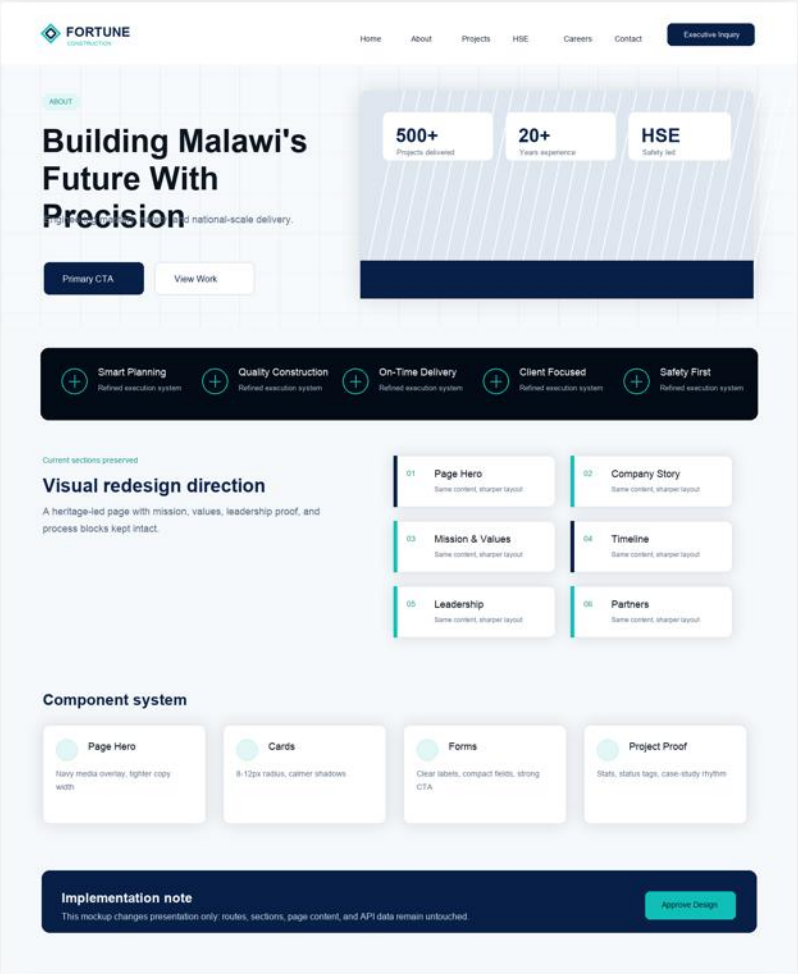

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Site 02 About

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

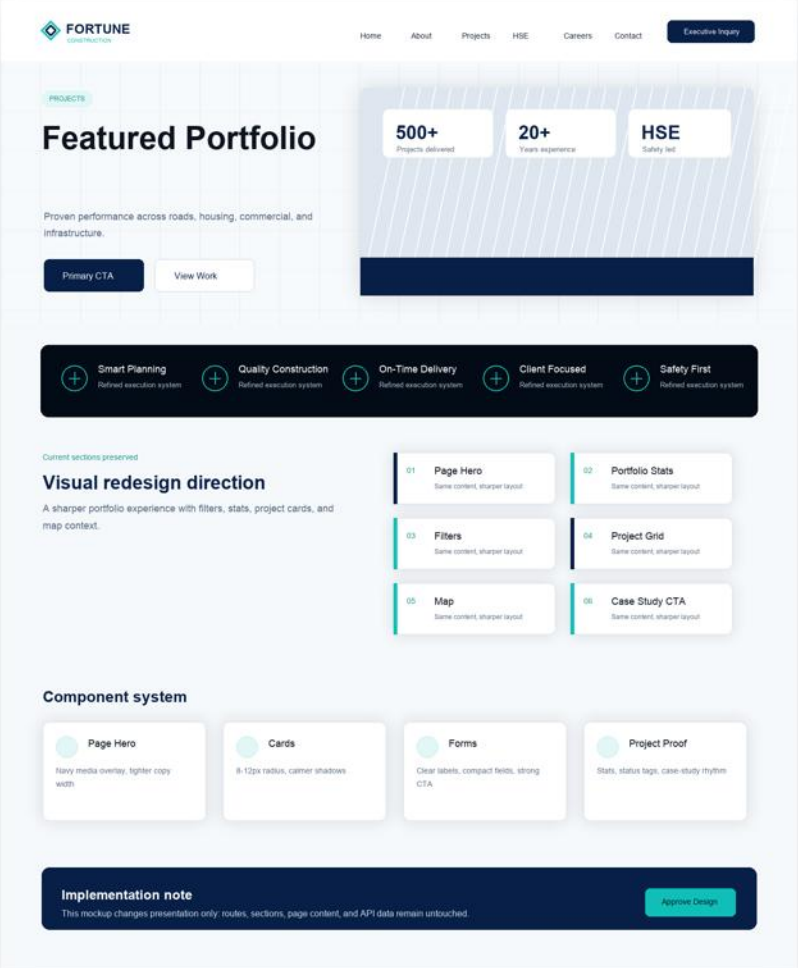

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Site 03 Projects

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

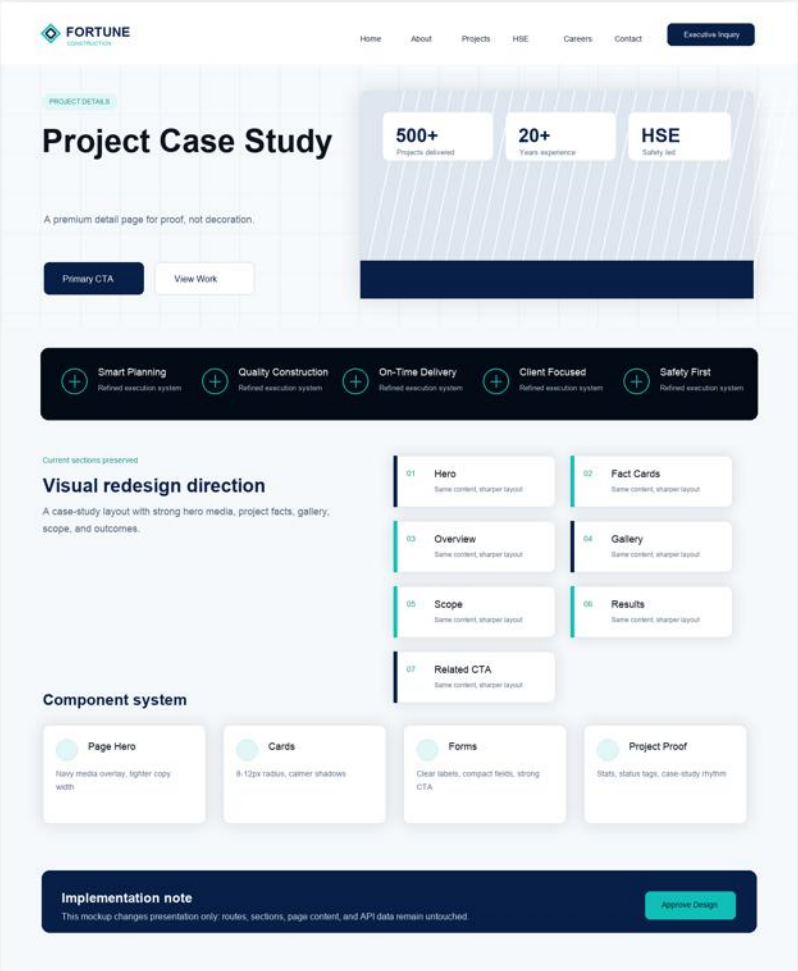

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Site 04 Project Details

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

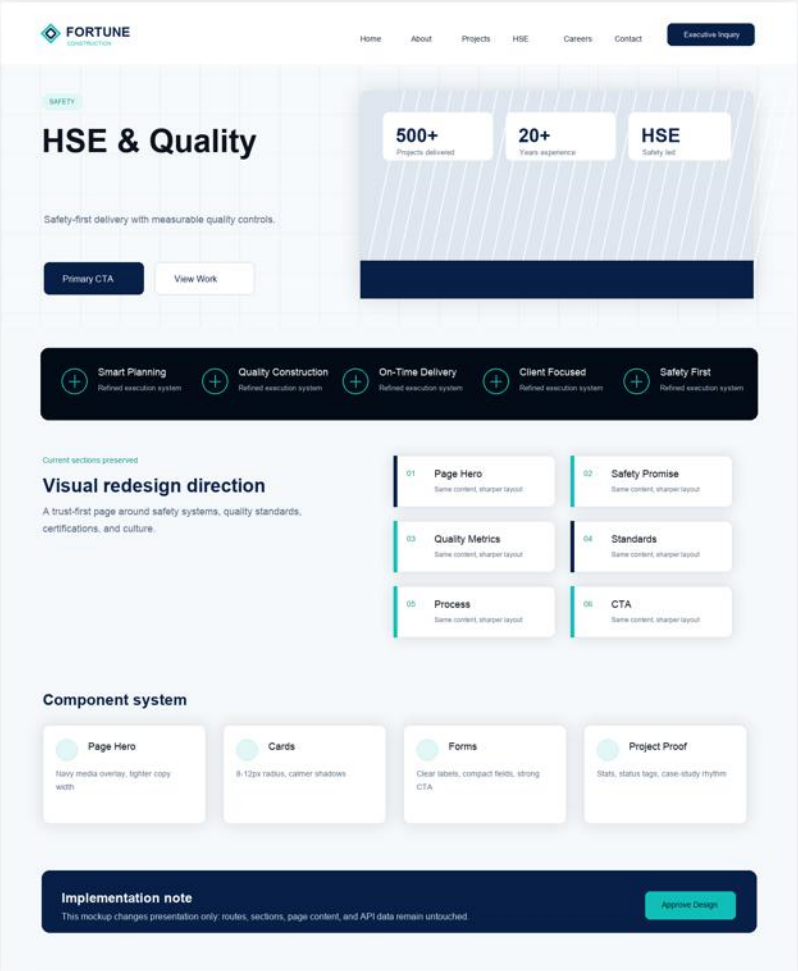

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Site 05 Hse Quality

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

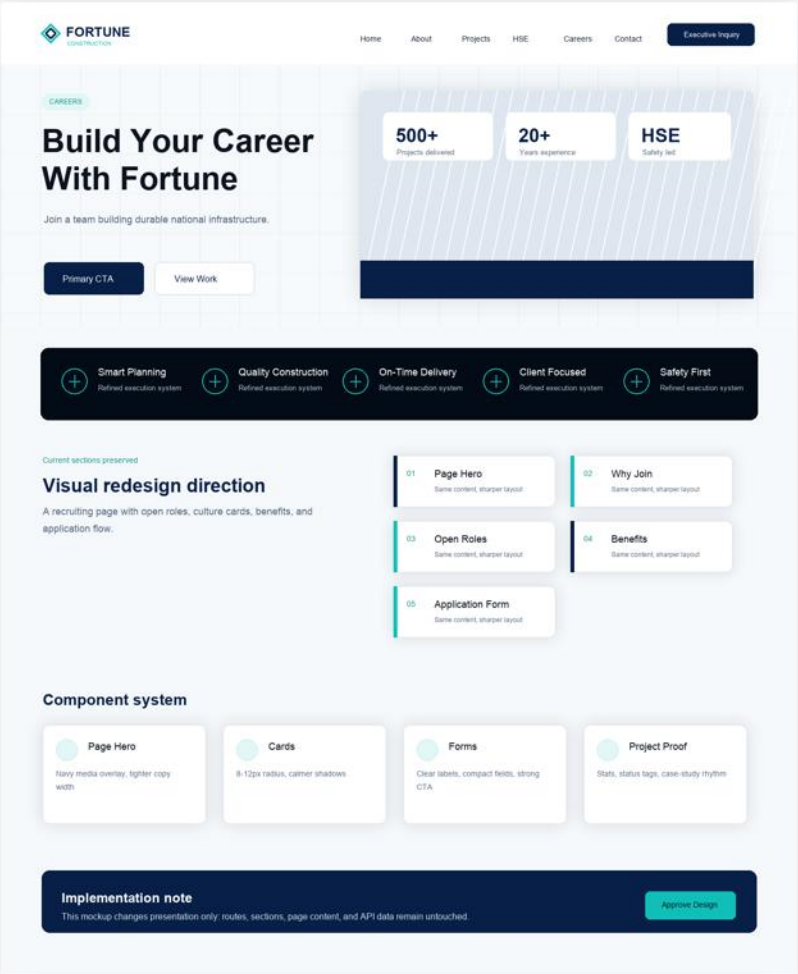

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Site 06 Careers

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

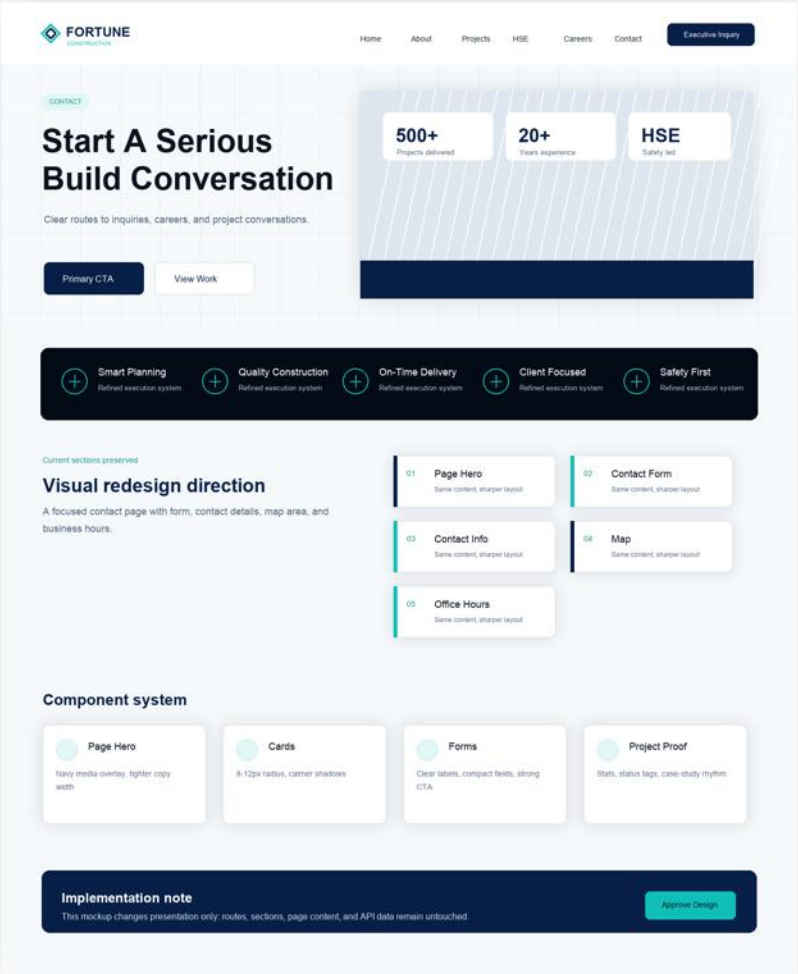

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Site 07 Contact

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

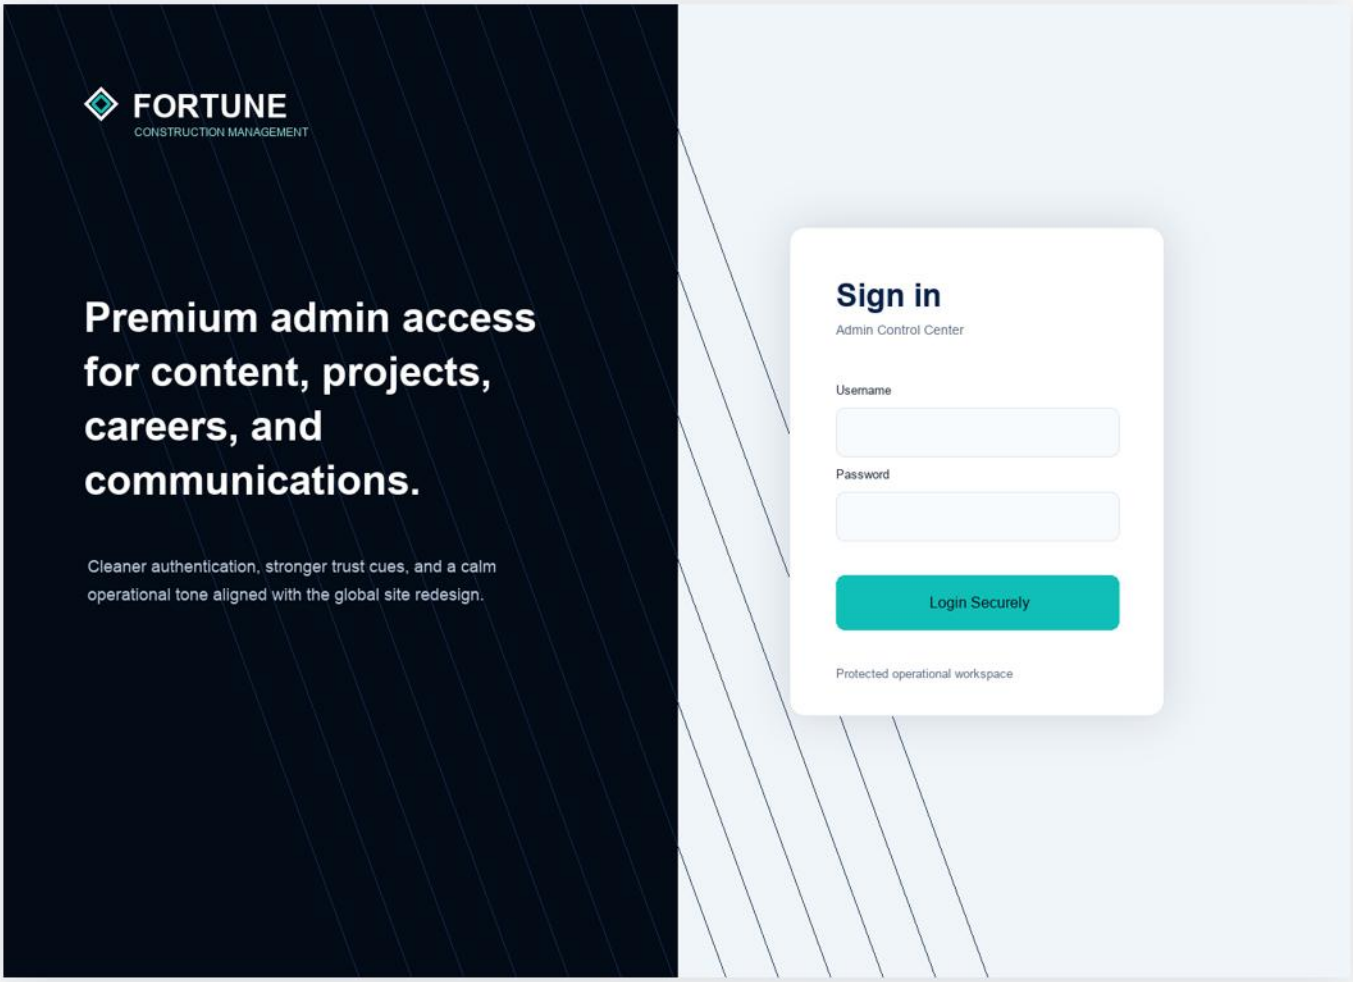

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 01 Login

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

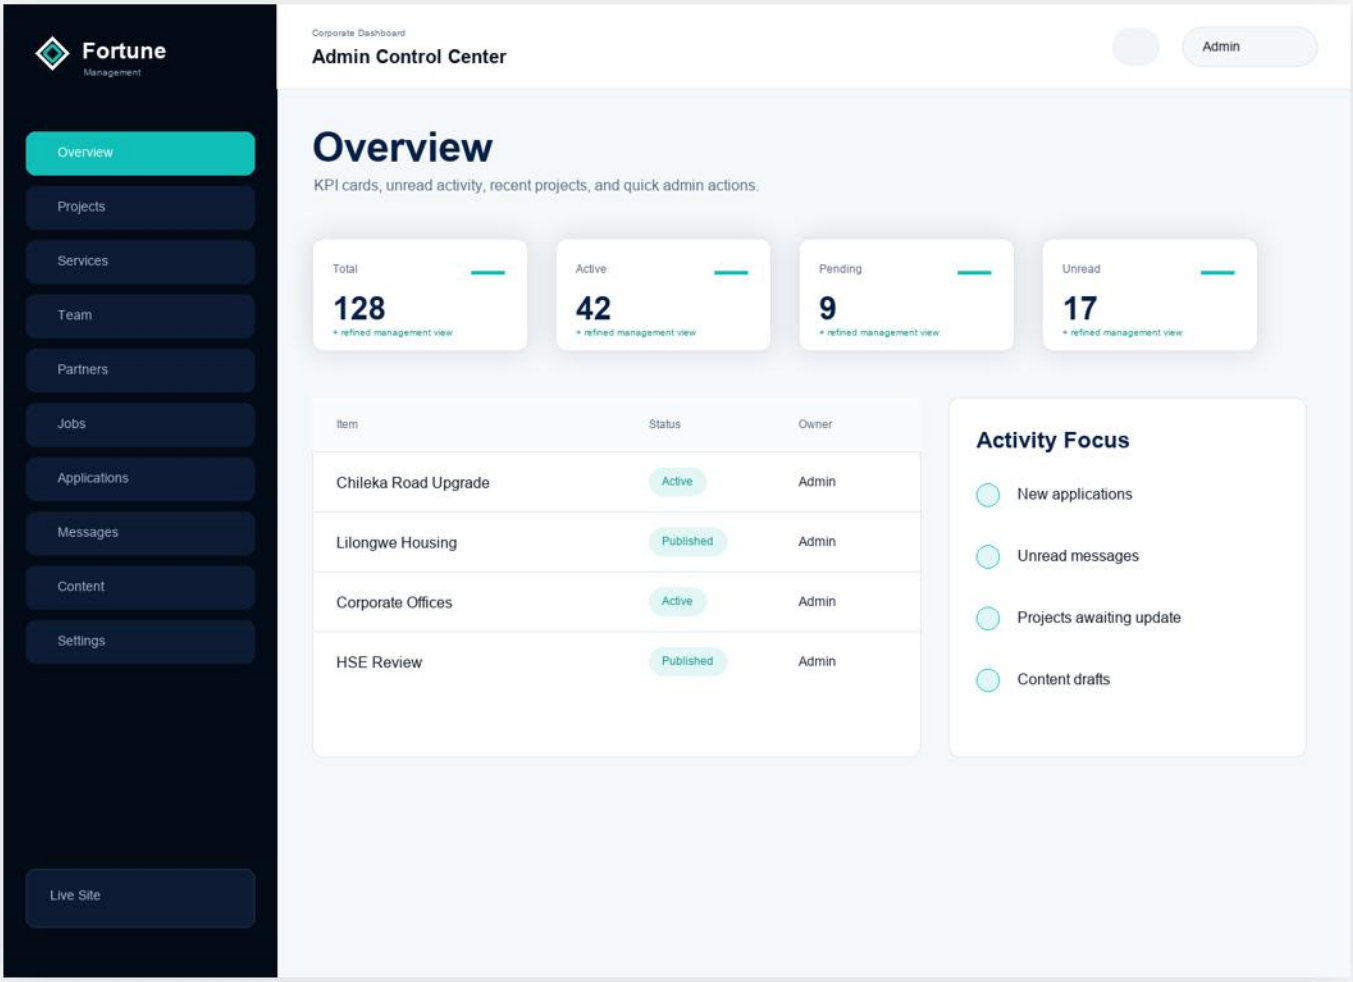

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 02 Overview

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

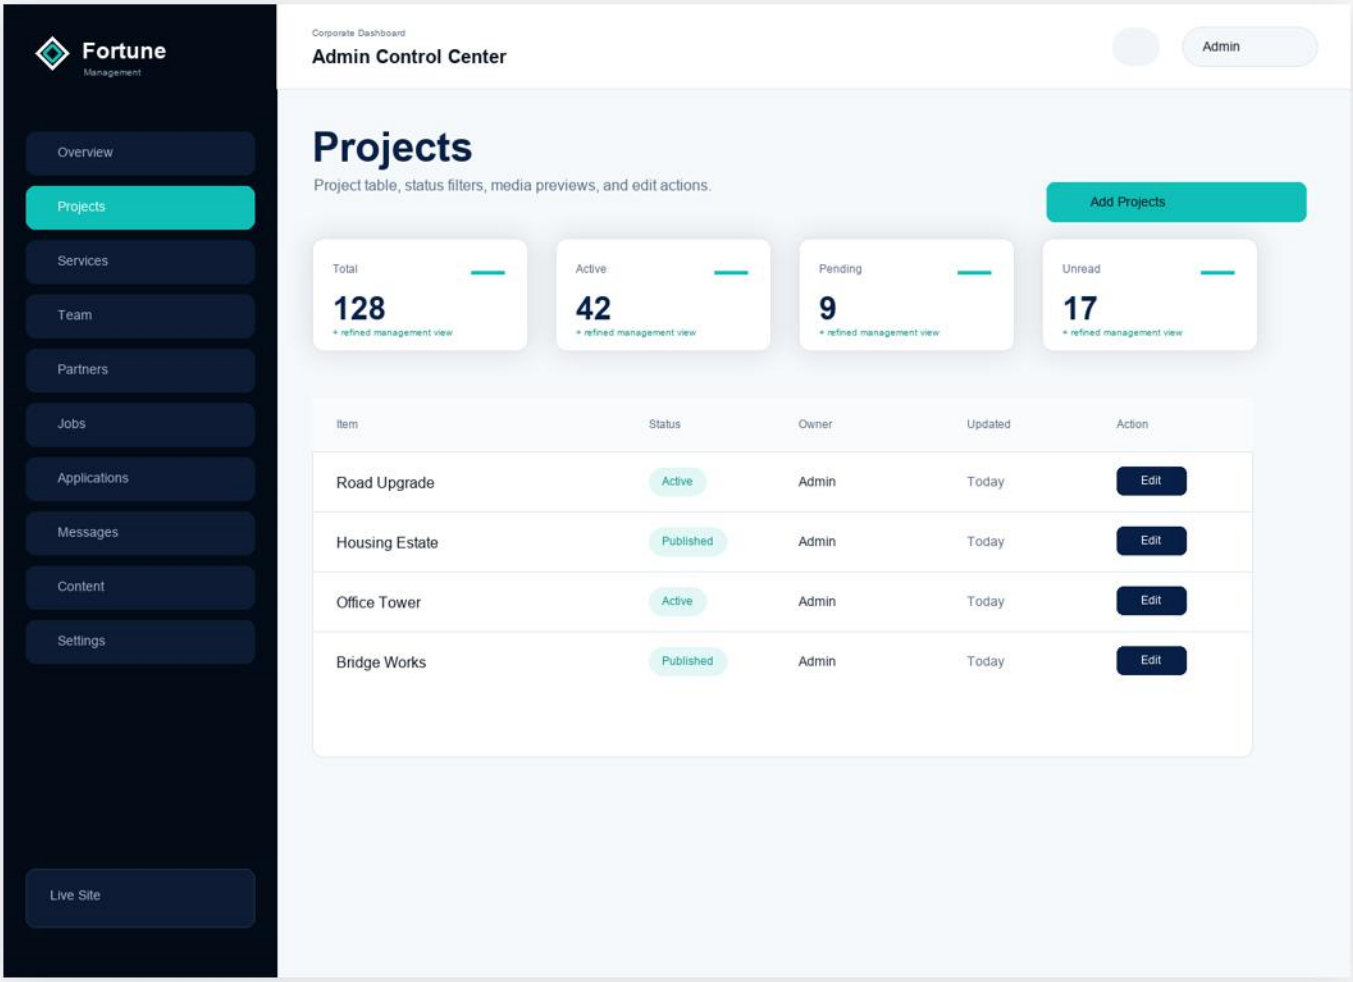

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 03 Projects

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

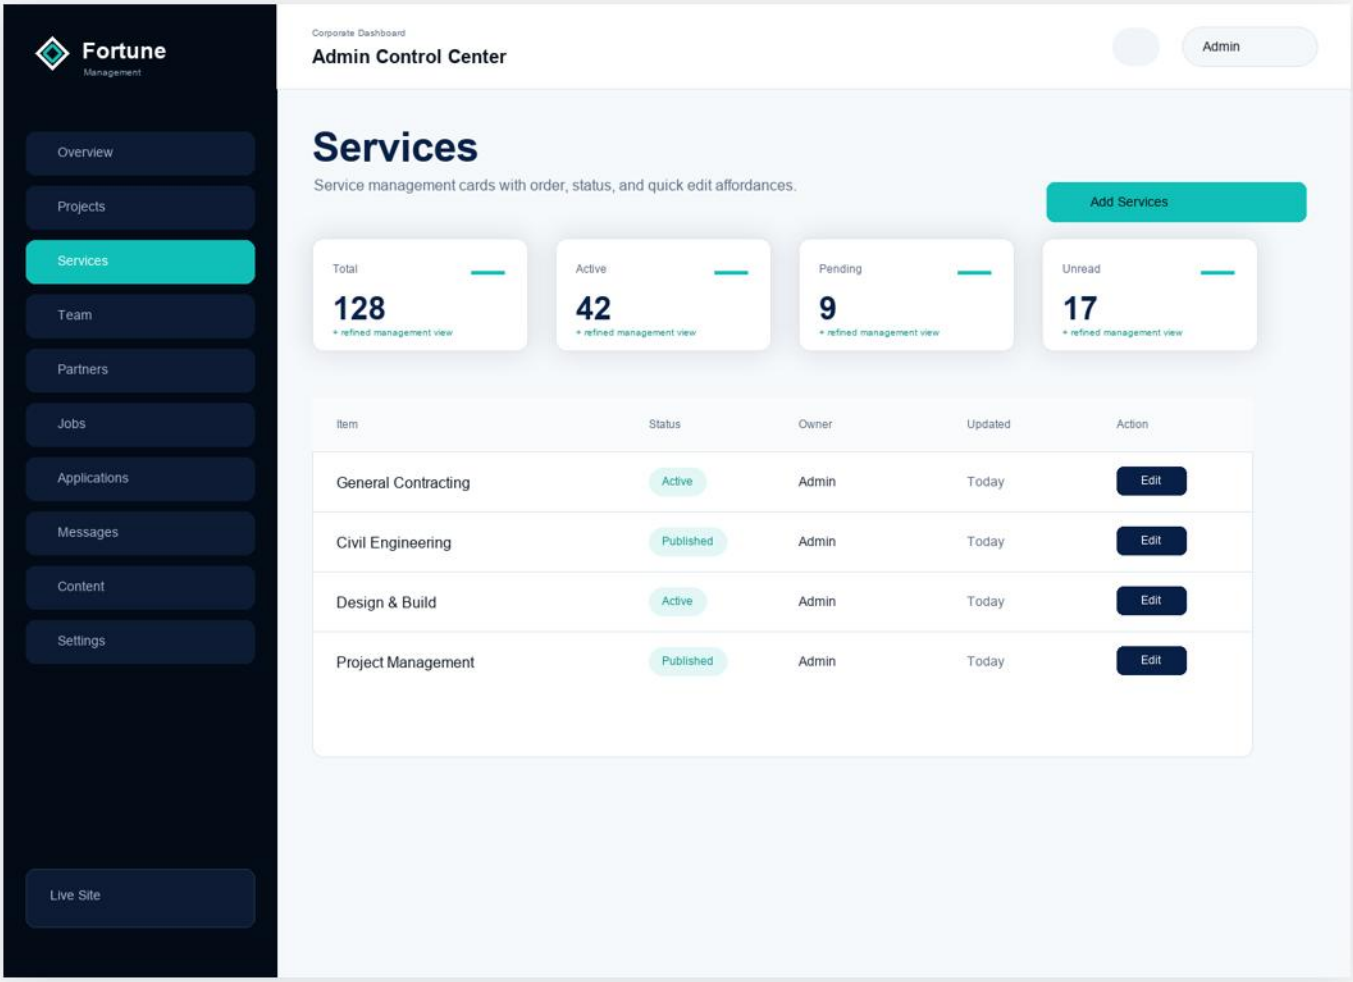

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 04 Services

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

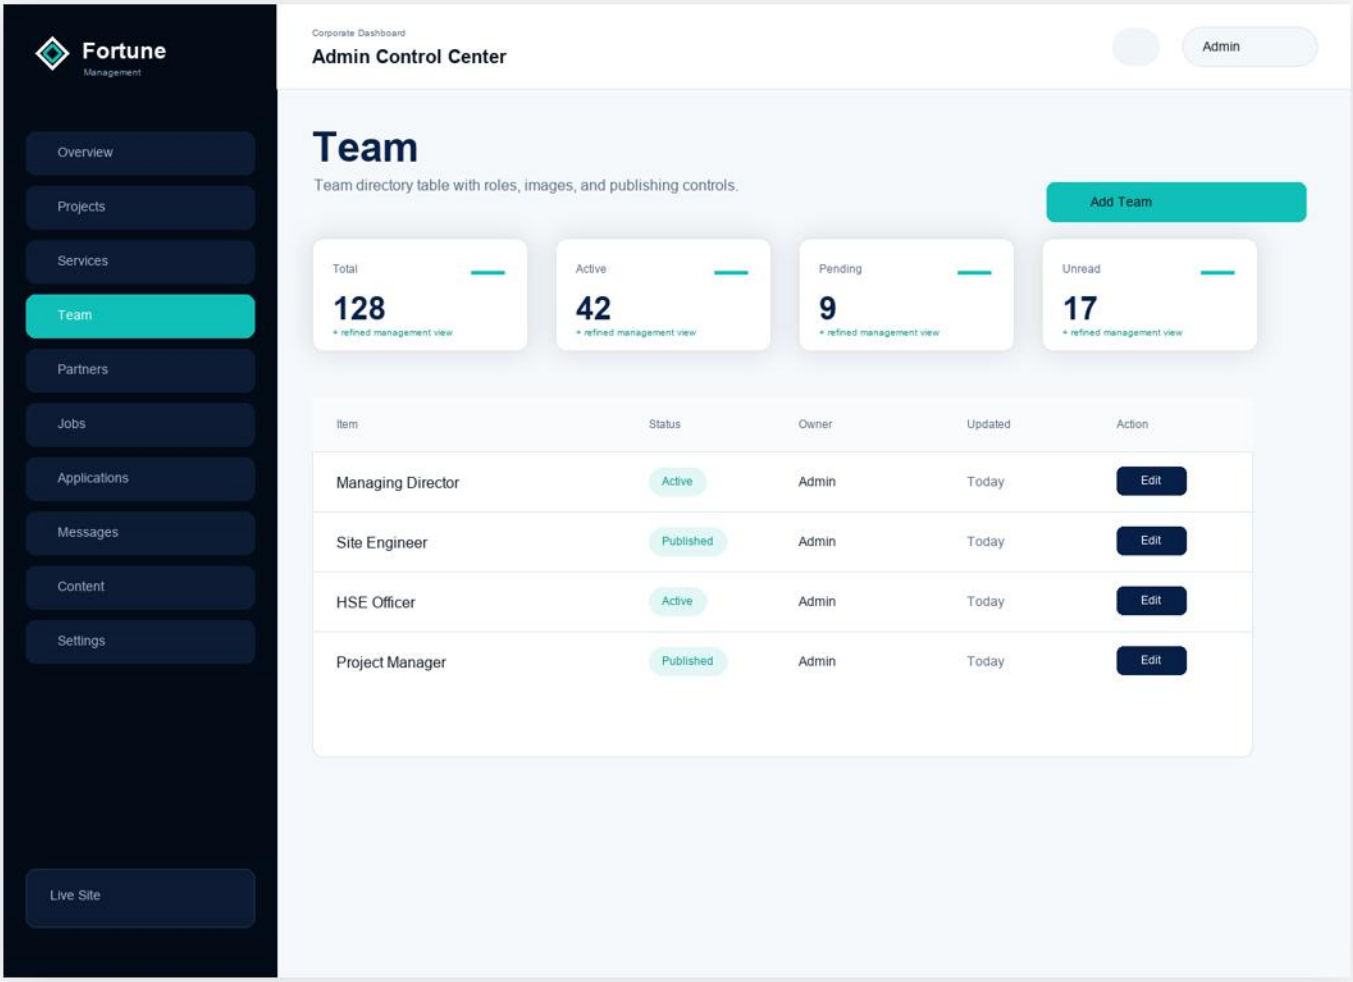

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 05 Team

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

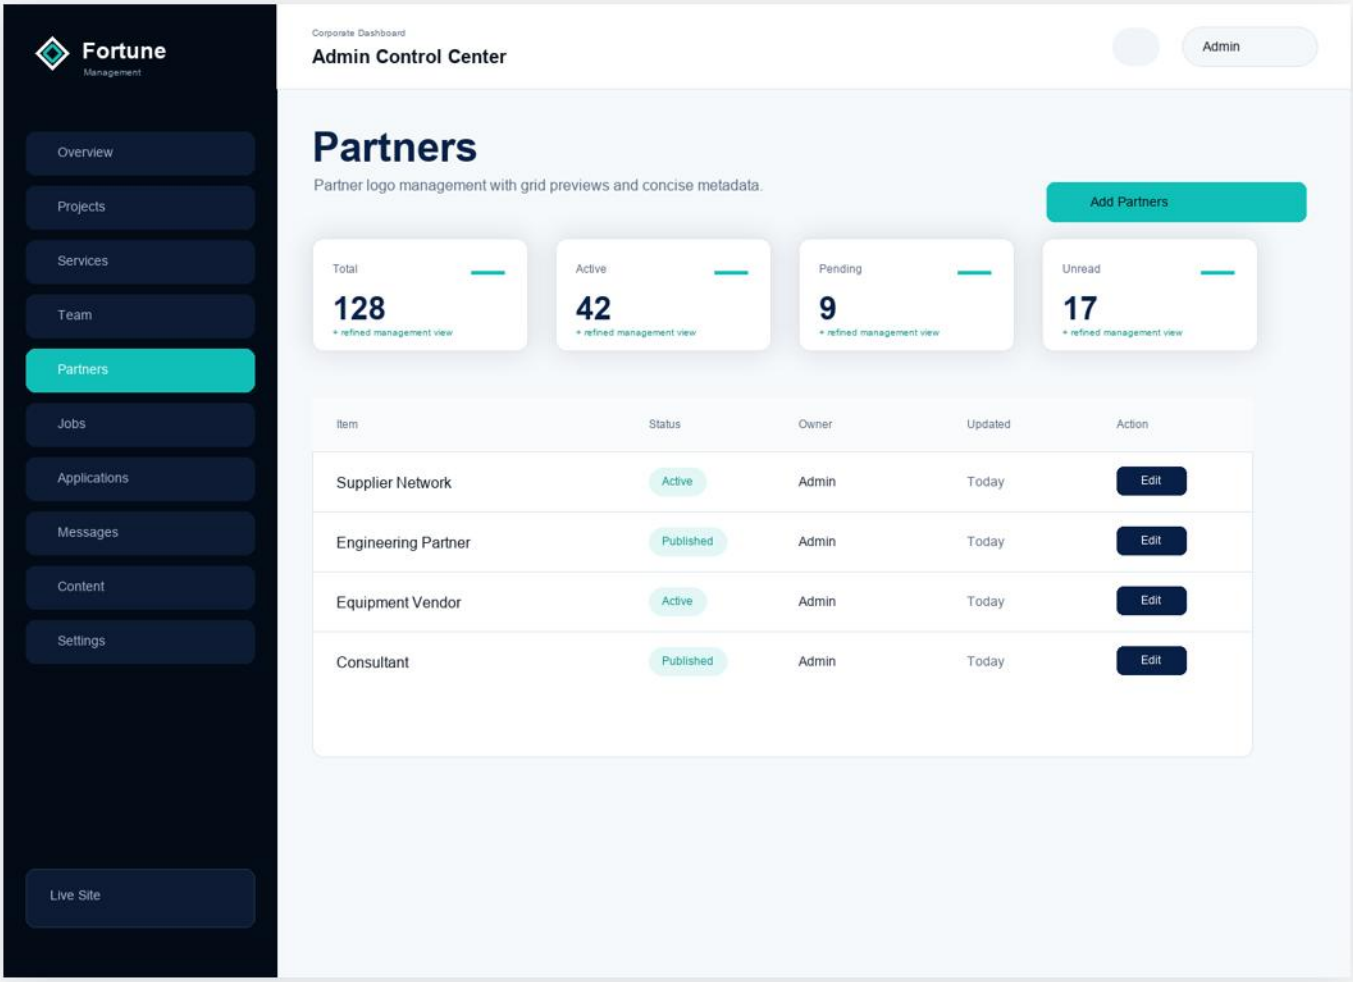

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 06 Partners

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

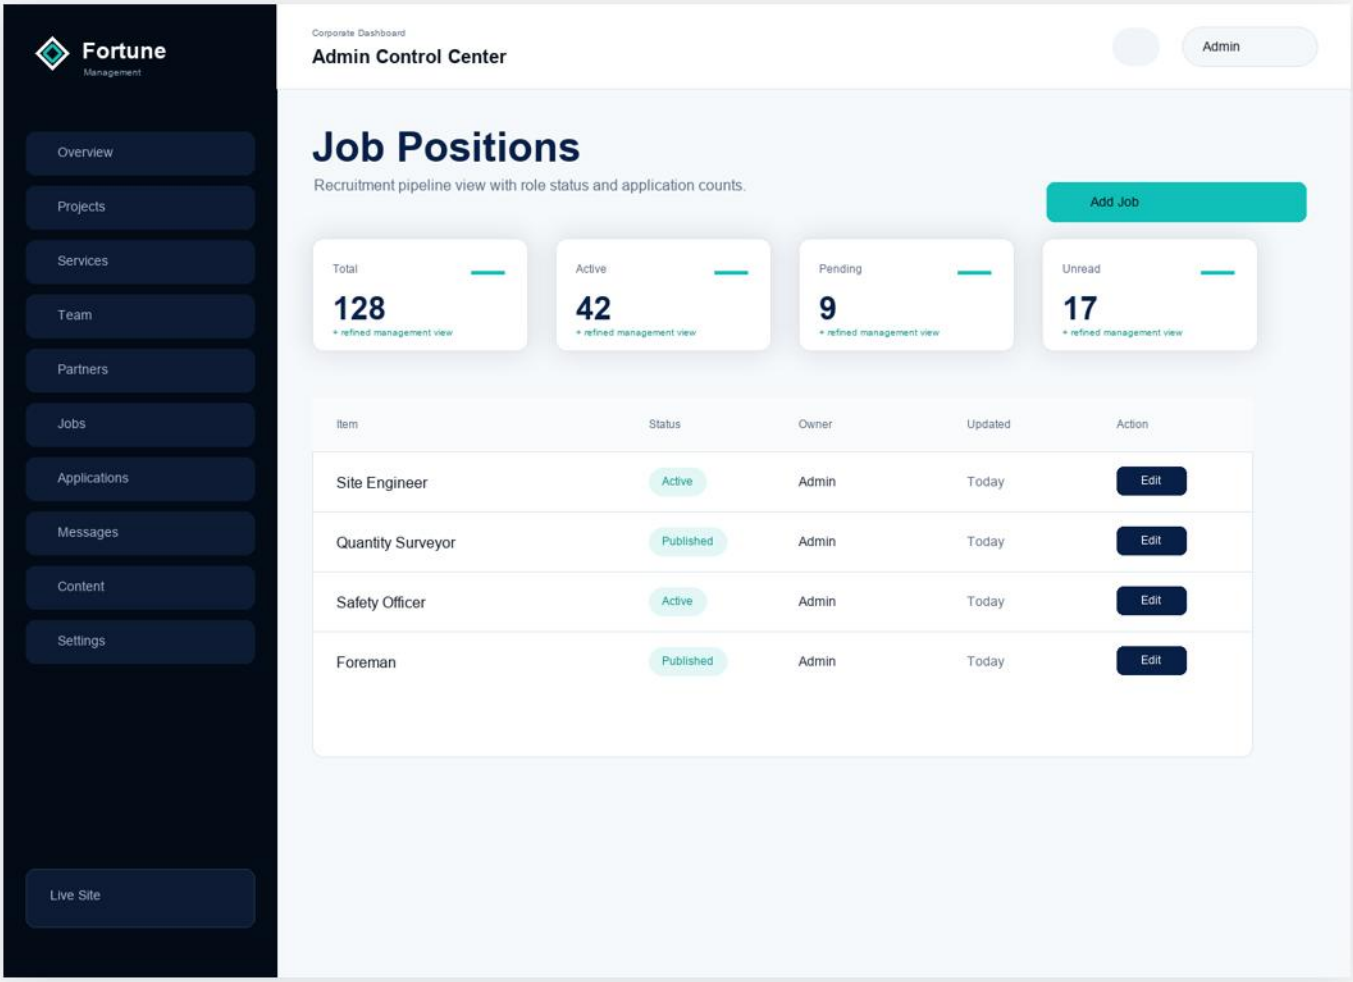

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 07 Jobs

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

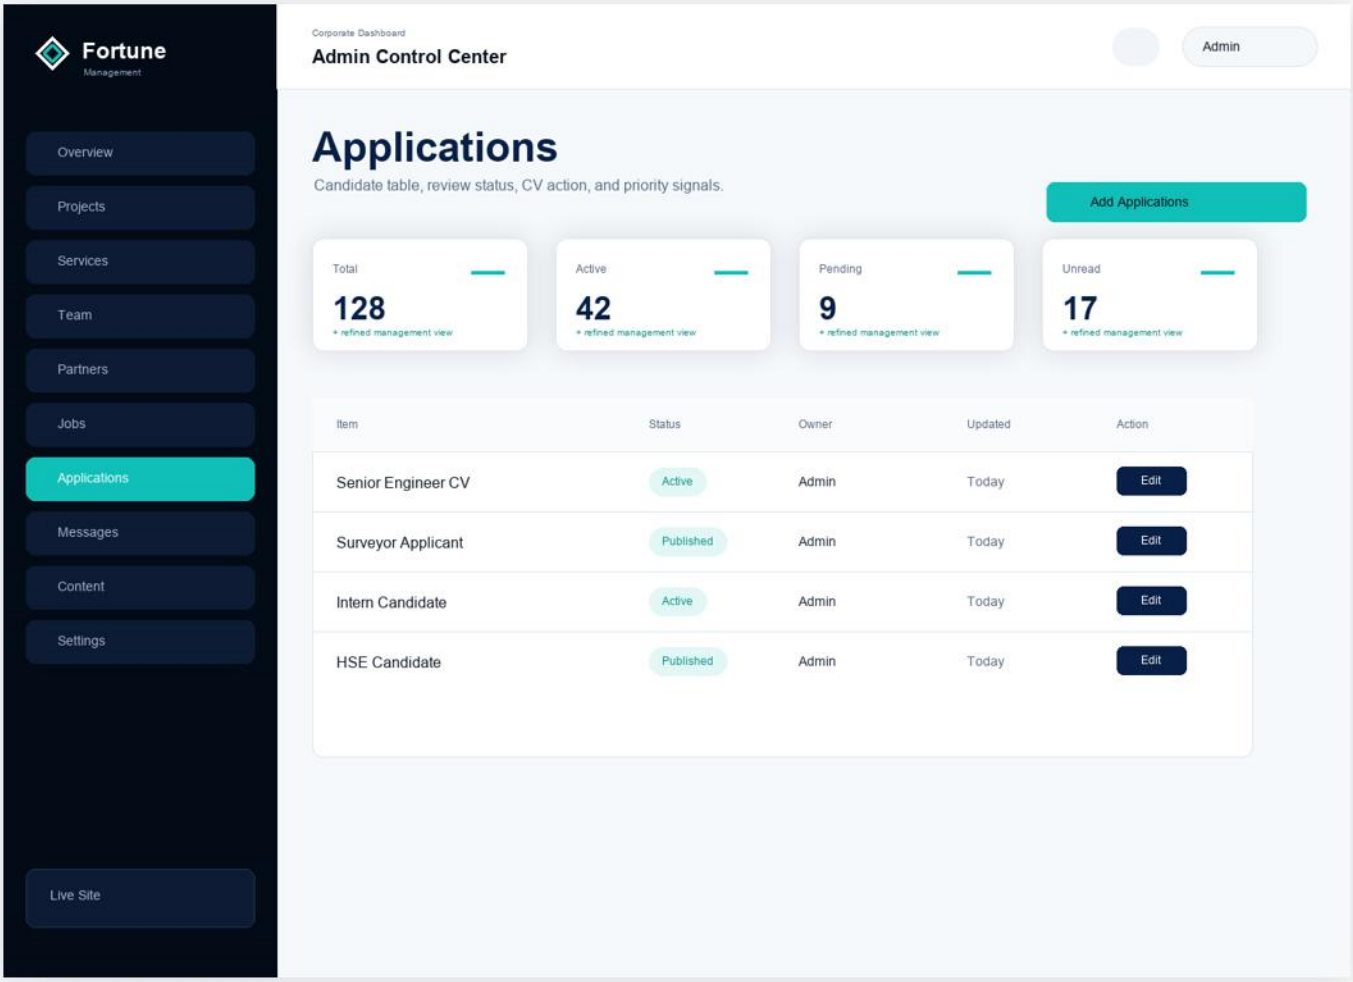

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 08 Applications

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

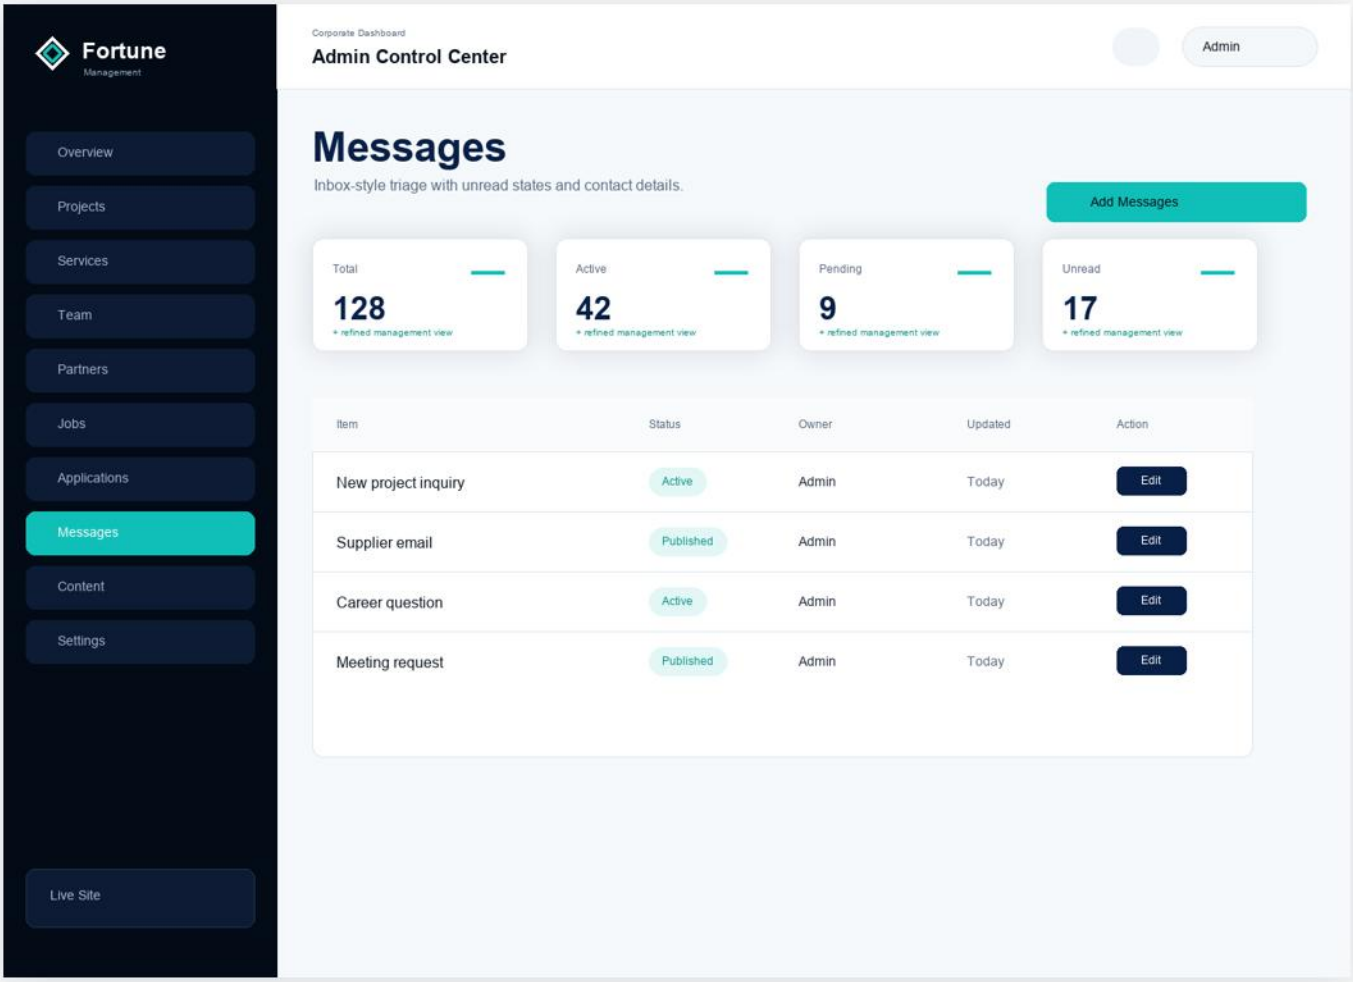

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 09 Messages

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

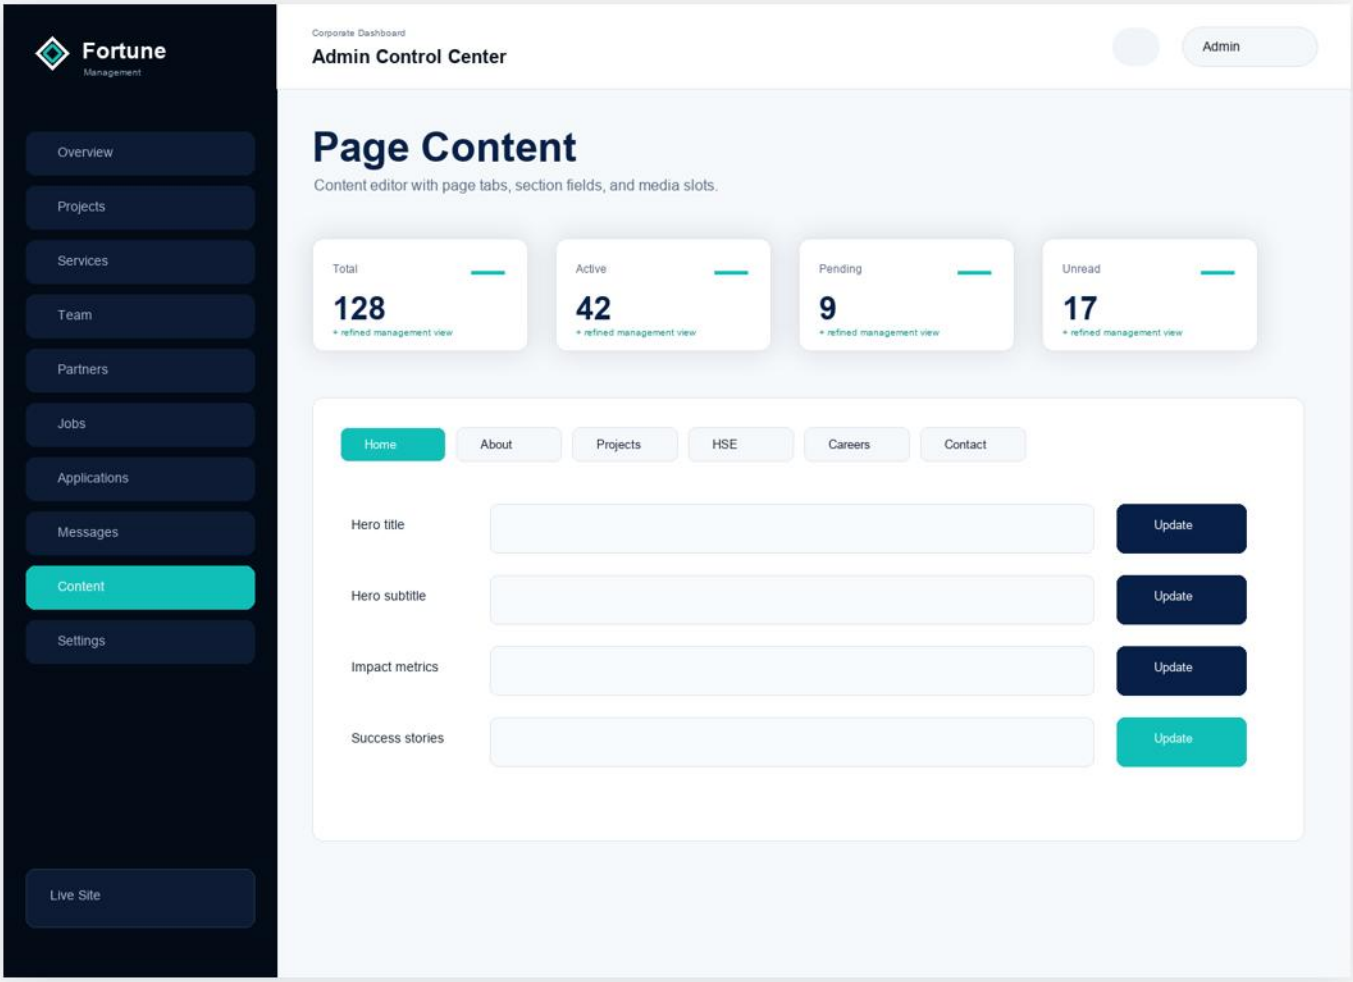

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 10 Page Content

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.

Dashboard 11 Settings

Design mockup PNG included in the delivery set. This screen preserves the current content intent while updating presentation.

- No route, API contract, or data model change is implied.
- Use this image as the visual target for the future implementation phase.
- Content remains editable through the existing dashboard and page content systems.
